Dear Sir

This is complaint which I would like to draw the kind attention of yours that we are suffering from defiled water supply, the drainage and sewage water is mixed with drinking water and that supply is given to us from last 15 days. The water is too polluted that we are unable to wash our hands even in this type of water. It is becoming the cause of various skin diseases and harmful health issues. We are suffering from loose motion and stomach problem because of this water. We want to talk about here about Swachh Bharat, healthy Bharat but in this small town we are suffering from this problem and no-one is able to solve this problem.

It's our humble request to you if you are concerned with your public then give us justice about that and cancel the agreement of private company which is responsible to provide water supply and also take action against local government and officers who are sleepy and don't do anything. I am also attaching a old video of that water supply and today's photo of that water. Hoping for favourable response within some hours.
